

# LEGO® Dominos Instructions

## COMPONENTS

- Game board
- LEGO® pieces for the 28 dual color LEGO dominos (56 LEGO bricks and 28 LEGO plates)

## OBJECT OF THE GAME

Build your way across the board. The first to reach his/her Finish Line wins the game.

## SETUP

1. Build your dual color LEGO dominos. For each LEGO domino, take one black plate, knob side up. Attach two LEGO bricks to it.

See chart below for the LEGO domino combinations to be built.

Red/Red	Blue/Blue	Yellow/Yellow	Green/Green	White/White	Orange/Orange	Black/Black
Red/Blue	Blue/Yellow	Yellow/Green	Green/ White	White/ Orange	Orange/Black	
Red/Yellow	Blue/Green	Yellow/ White	Green/ Orange	White/ Black		
Red/Green	Blue/White	Yellow/ Orange	Green/Black			
Red/White	Blue/Orange	Yellow/ Black				
Red/Orange	Blue/Black					
Red/ Black						

Put all the LEGO dominos back in the game box.

2. Set up the game board so that Player 1 sits in front of the “1” on the game board. This end of the board is his/her Finish Line.
3. If there are only **two** players, each player chooses at random (with his/her eyes closed) seven LEGO dominos from the game box and sets them behind his/her number (off the game board). If there are **three to four** players, each player chooses five LEGO dominos.
4. Keep the remaining LEGO dominos in the game box.

## **SIMPLE GAME PLAY**

1. The youngest player (Player 1) with a “double domino” piece (2 of the same color LEGO bricks, for example Red/Red) goes first. If no player has a “double domino” piece, all players place their LEGO dominos back into the game box and all players choose new LEGO dominos.

Player 1 then puts down his/her “double domino” on top of the “LEGO Dominos” in the center of the board.

2. Play passes to the left. Player 2 chooses to play at any “open end” a LEGO domino from his/her pile, matching the color of the LEGO domino Player 1 placed in the center earlier.

NOTE: For this simple game play, the LEGO dominos lie end to end not on top of each other. Players play the LEGO domino pieces like standard dominos except players move to their Finish Lines by matching colors.

3. If Player 2 is unable to play a domino because s/he does not have a color that matches the domino in the center of the board, s/he, with eyes close, picks a LEGO domino from the game box. If the LEGO domino piece is playable, Player 2 plays the piece. If the LEGO domino piece is not playable, his/her turn is over and play continues to the left.

NOTE: If a player has a playable LEGO domino piece, s/he must play that piece even if it helps another player.

4. If at some point, a player is unable to place one of his/her dominos on the board and there are no longer any dominos remaining in the game box, then that player’s turn is over and play passes to the next player.

## **WINNING THE GAME**

The first player to reach his/her Finish Line wins.

## **ADVANCED GAME PLAY**

1. The youngest player (Player 1) with a “double domino” piece (2 of the same color LEGO bricks, for example Red/Red) goes first. If no player has a “double domino” piece, all players place their LEGO dominos back into the game box and all players choose new LEGO dominos.

Player 1 then puts down his/her “double domino” on top of the “LEGO Dominos” in the center of the board.

2. Play passes to the left. Player 2 chooses to attach a LEGO domino from his/her pile, matching the color of the LEGO domino Player 1 placed in the center earlier. Player 2's LEGO domino can be **attached** on an "open" end of a LEGO domino. It can be attached either underneath or on top of the matching color, but it must be attached using **ONLY TWO** of the studs on the LEGO domino and cannot topple the LEGO stack.
3. If Player 2 is unable to play a domino because s/he does not have a color that matches the domino in the center of the board, s/he, with eyes close, picks a LEGO domino from the game box. If the LEGO domino piece is playable, Player 2 plays the piece. If the LEGO domino piece is not playable, his/her turn is over and play continues to the left.

NOTE: If a player has a playable LEGO domino piece, s/he must play that piece even if it helps another player.

4. If at some point, a player is unable to place one of his/her dominos on the board and there are no longer any dominos remaining in the game box, then that player's turn is over and play passes to the next player.

### **WINNING THE GAME**

The first player to reach his/her Finish Line or be the closest player to his/her Finish Line wins – but watch out! You cannot let your LEGO creation topple. If there is a tie, the tied players are all declared LEGO dominos champions and the game is over.
