14 Carrot

You are looking for carrots that you eat – two bunches with six carrots in each, and two single carrots. One of the bunches of six is located toward the center of the puzzle. One single carrot is located in the lower left hand corner, near the edge of the puzzle, and just to the right of that single one is the second bunch of six carrots. The other single carrot is close to the lower right, but still near the center.

REMEMBER: All carrots you are looking for must all have stems on them.
