

Double LADDERBALL

America's Favorite Bola Game

Setup:

Ladders are placed 25' apart. Play as singles (2 players) or teams (4 players). One player/team throws the red bolas and the other plays blue. Players stand next to one ladder and toss to opposite ladder. Play continues back and forth between the two ladders.

Objective:

Be the first player or team to score 21 points. Points are scored by wrapping or landing bolas on any of the three colored crossbars.

Point Values:

Blue bar (top bar) = 3 points

Red bar (middle bar) = 2 points

White bar (bottom bar) = 1 point

(Black bar has no point value)

Classic Ladderball Game Play:

Each player throws their three bolas alternately with the other player/team. Once all bolas have been tossed, each player/team adds up the total points scored for that round. If your bola was knocked off by your opponent, those points are lost. The player/team with the highest score for that round subtracts the other player/team's score from their own and this becomes their new score. The other player/team gets no points. With each round, scores are added until one player/team reaches 21 and wins.

Example of scoring a round:

Player/Team 1 lands:

1 on the blue bar (3 pts ea)	3 pts
2 on the red bar (2 pts ea)	4 pts
Total	7 pts

Player/Team 2 lands:

1 on the red bar (2 pts ea)	2 pts
2 on the white bar (1 pt ea)	2 pts
Total	4 pts

Player/Team 1 had the higher score, so they subtract Player/Team 2's score from their own ($7-4=3$) and add 3 points to their total score.

ASSEMBLY INSTRUCTIONS

Unpack contents and inspect to ensure you have the following parts:

- 4 A-Uprights (Top)
- 4 B-Uprights (Bottom)
- 4 Upright Connectors
- 4 T-Connectors
- 8 Black Base Bars (weighted)
- 2 Blue Crossbars
- 2 Red Crossbars
- 2 White Crossbars
- 2 Black Crossbars
- 3 Red Bolas
- 3 Blue Bolas

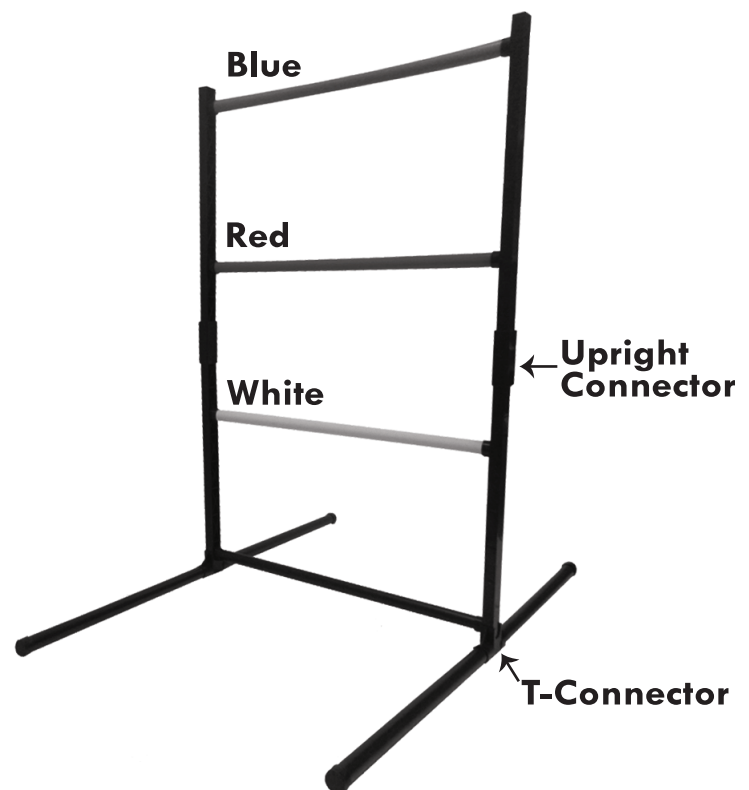

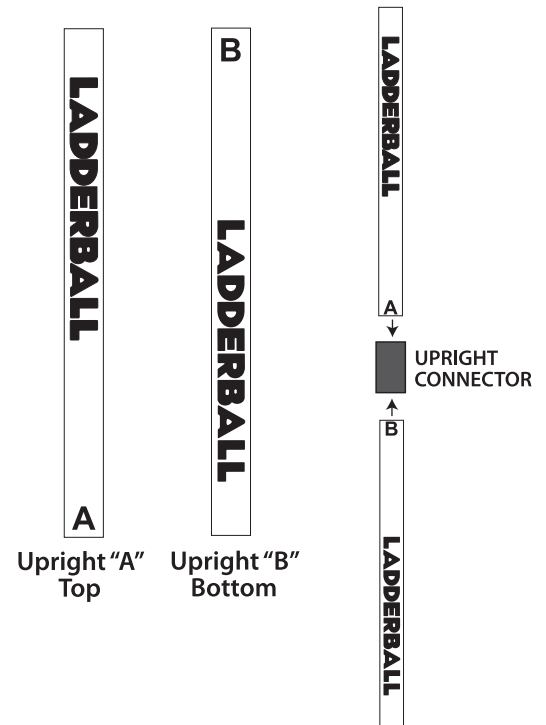

Assemble uprights - Take note that there are two distinctly different parts and are labeled as "A" or "B". Part A is the top portion of the upright, and part B is the bottom. Assemble one A and one B together by inserting them into upright connector as shown at right. Make sure the flat portions of the D-shaped cavities on the inside of the uprights are all facing down. Repeat this procedure with the other A and B parts to create four long uprights.

Insert Crossbars - Insert crossbars into uprights. Each assembled ladder has a blue, red, white and black "D" shaped crossbar and two uprights. Insert ends of the crossbars into the D-shaped cavities on the inside of a pair of uprights. Note: The flat part of the bars should be facing the ground, leaving the rounded side facing upward. Repeat this procedure to create two ladders. Make sure to arrange the bars in the following order: blue on top, red in the middle, white next, and black on the bottom.

Insert one T-connector onto the bottom of each upright.

Attach base bars - Insert two weighted black base bars (with end caps facing out) into each end of the T-connectors to complete assembly of ladders.

Set the ladders 25' apart and play!
